DEEP LIVER DETOX

Highly effective, rapid cleansing of the digestive system in combination with a vitamin-mineral infusion. Only possible following consultation with your doctor.

Liver infusion

INFUSIONS

Physical or mental stress that can lead to a loss of vitality, fatigue and a weakened immune system. This in turn often results in vitamin and mineral deficiencies, because the entire organism needs increased vital substances to cope with such stressful situations. This is exactly where our infusion concept comes in and gently compensates for a reduced supply or an increased need for vitamins and trace elements.

Replenish vital nutrients such as vitamins, minerals and trace elements simply and efficiently with targeted infusions and feel fitter and more energetic in the long term. Infusions can also provide targeted support for the therapy and treatment of chronic or acute illnesses. Infusions combine valuable nutrients and vitamins in higher

concentrations than is possible with oral intake. This leads to a better absorption rate and a more effective effect than with oral supplementation. For increased energy quality, a strengthened immune system, beautiful skin and an effective improvement in health and overall well-being.

Accompanying your treatments and diagnostics, we create an individual infusion therapy and laser therapy tailored to your needs.

- Individual infusion (cell build-up, balancing deficiencies, strengthening of the immune system, detoxification, inflammation, vegetative dysregulation)
- Ozone own blood
- Intravascular laser therapy
- NAD+ infusion

CELLGYM INTERVAL HYPOXIA HYPEROXIA TRAINING (IHHT)

Nowadays, our physical ability to effectively generate energy is severely impaired. The reasons for this are numerous: the natural aging process, stress, time pressure, a lack of exercise or insufficient sleep are just some of the negative factors. This causes a lack of energy in the cells, which in turn leads to performance losses and chronic degenerative diseases such as burn-out, diabetes, rheumatism, immunodeficiency and allergies.

SIMULATED ALTITUDE TRAINING

Professional athletes have long been benefitting from the advantages of altitude training for a long time to boost their performance. Interval hypoxia hyperoxia training (IHHT) is a gentle, non-invasive cell stimulation without side effects.

During the 45-minute IHHT session - in a pleasant atmosphere - heart rate, oxygen partial pressure in the tissue and breathing rate are permanently measured via biofeedback. This exact monitoring

of the physical reactions enable an optimal training intensity.

Since the therapy is individually adapted to your state of health, it is suitable for anyone who wants to experience the positive effects of hypoxia and hyperoxia, such as improvement of general well-being, physical and mental performance, stress tolerance and weight reduction, in an efficient, relaxed and joint-friendly way.

CellGym is suitable for all persons. 2–3 sessions can be applied per week.

CRYOTHERAPY AT LANSERHOF

The soothing and healing power of the extreme cold was first systematically tested in Japan in the 1980s.

The successes in the cryotherapy chamber led to its recognition as a highly effective form of passive, physical, short-term therapy.

The body's short-term exposure to a temperature of -110°C blocks its sensitivity to pain and also acts in an anti-inflammatory manner.

The strong analgesic effect breaks pain memory - which chronic pain can serve to over-activate - while also promoting its re-regulation.

The positive effects of applying cold can sometimes be felt after just one treatment. Most patients report a noticeable improvement after some fourteen days. The improvement

can persist for up to six months.

The performance-enhancing effect of whole-body cryotherapy is caused by the redistribution of the blood in the body: the effect of the cold forces the blood from the skin into the body, causing a better supply of blood to the muscles. Athletes, in particular, use this special effect to increase the efficiency of their training.

RECOMMENDED USE

1–2 sessions per day for a maximum of three minutes each, over a period of between fourteen days and four weeks.

AREAS OF APPLICATION

Rheumatic diseases, arthritis, spinal disorders, chronic pain, blunt injuries to joints, joint or spinal conditions after surgery, skin diseases such as eczema and psoriasis, insomnia, increased stress.

WATER PLASMA

Water plasma combines both the aforementioned effect of hydrogen and the positive qualities of oxygen. The most valuable and unique part of water plasma is the highenergy water and the combined effect of all its components. Experience to date has shown amazing and varied positive dynamics and developments in individual results. One special feature of the many bio-available electrons in water plasma is that they strongly counteract “oxidative stress” in the body.

Water plasma is formed as a result of the influence of electrical voltage on water molecules. BeyondScience has developed a suitable plasma generation method specifically for QoreB. Water plasma is essentially formed from high-energy

water, which has a large number of readily available electrons. These are responsible for its special health-promoting properties - even compared to pure molecular hydrogen.

APPLICATION

Inhalation and local application to the body.

Plasma Stream – active

50 min.

Plasma Stream – passive

80 min.

INUSPHERESE®

INUSphere® is an innovative form of therapy that purifies the blood and helps to remove harmful substances from the body. The name is derived from immunopheresis, a special type of blood purification that particularly targets the immune system and detoxification.

As part of INUSphere®, blood is taken from the patient, which is then passed through a filter system. This process removes various toxic substances, heavy metals, excess immune cells, inflammatory mediators, lipoproteins and other pathogenic particles. The purified blood is then returned to the circulation.

The aim of this therapy is to support the body's self-healing powers, reduce inflammation and relieve the immune system. It can be used for a

variety of conditions, including chronic inflammation, autoimmune diseases, environmental stress or even general health prevention.

INUSphere® is particularly gentle, well tolerated and is often used as an alternative or complementary therapy for patients with chronic conditions. As it can effectively rid the body of harmful substances, it helps to improve general well-being and promote the healing process.

THE LANSEHFHOF MODULES

The Lanserhof Concept is as individual as you are. Building on our Lanserhof fasting therapy, you have the option of choosing individual modules on specific focal points, because every body has its very own desires and needs. Of course, you can book desired and necessary treatments, diagnostics and therapies individually and thus put together your own personal programme with your accompanying doctor.

As part of the Lanserhof Concept, our medically oriented derma treatments serve as a key pillar in promoting and sustainably supporting skin regeneration and health at the highest level. All Lanserhof derma treatments and applications can be found in our dedicated DERMA BROCHURE AVAILABLE ON OUR WEBSITE
